2.5" SATA Solid State Disk
Specification

Datasheet Version 1.2

General Description

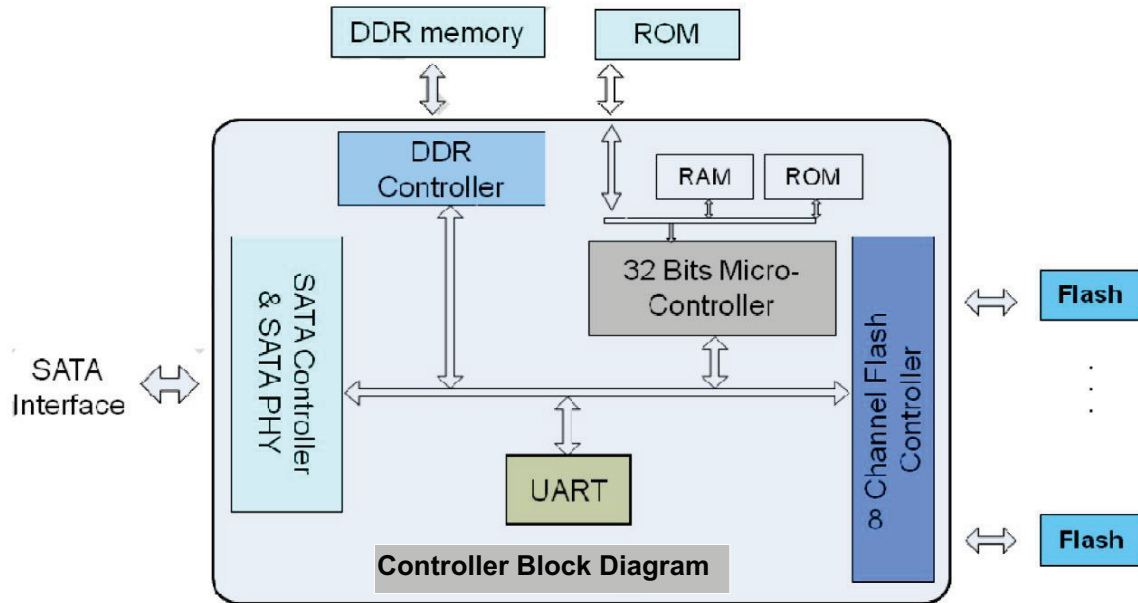

1.1 Overview

Unity Digital’s 2.5” SATA Solid State Disk (SSD) delivers all the advantages of Flash Disk technology with Serial ATA II interface, fully compliant with standard 2.5-inch form factor.

The SATA SSD is based on a standard 7-pin interface for data segment and 15-pin for power segment, designed to operate at a maximum operating frequency of 150MHz with 30MHz external crystal. Its capacity could provide a wide range from 4GB to up to 512GB. Also it can reach more than 200MB/s read as well as write high performance based on MLC flash (with 128MB mobileDDR enabled and measured by CrystalDiskMark v3.0 1000MB test unit). The power consumption of Flash Disk is much lower than traditional Hard Drive. In addition, Unity Digital’s SSD provides hot-swapping abilities when removing, replacing or upgrading flash disks.
